

Excursion Policy – Information for Best Travel Partners

Best Travel is committed to offering our guests excursions that are not only memorable, but also responsible. To support this, we have developed an Excursion Policy that outlines the principles we strive to follow when selecting, developing, and operating excursions together with our trusted partners.

We share this policy with you to ensure transparency and to create a shared understanding of the standards Best Travel aims to uphold in all guest excursions. We highly value your cooperation in helping us achieve these goals.

Sustainability Principles for Excursions Offered to Best Travel Guests

1. Environmental Responsibility

Best Travel aims to minimise the environmental impact of the excursions we offer. We therefore seek to collaborate with partners who:

- Use low-emission or fuel-efficient transport options where feasible.
- Protect local nature by avoiding activities that may harm wildlife, vegetation, or fragile ecosystems.
- Follow good waste-management practices and help reduce single-use plastics during excursions.

2. Social and Cultural Responsibility

The excursions we offer should contribute positively to local communities and respect cultural heritage. We therefore value partners who:

- Ensure excursions promote respectful interaction with local traditions, customs, and communities.
- Provide fair and safe working conditions for all staff involved.
- Support guest awareness by communicating local etiquette, cultural norms, and any site-specific guidelines.

3. Economic Sustainability

Best Travel aims to strengthen the destinations we work with by supporting local economies. We therefore prioritise partners who:

- Are locally based or engage local guides, suppliers, and small businesses.
- Ensure that tourism revenue benefits the local community in a fair and meaningful way.
- Offer experiences that highlight local crafts, cultural heritage, and regional identity.
